

MAPLE LEAF MATTING

-SERVING EASTERN CANADA-

MATTING FOR EVERY SECTOR

-SERVING EASTERN CANADA-

Maple Leaf Matting is a wholly owned subsidiary of Strad inc., and is 100% Employee Owned. We offer high-quality environmental access matting and related services for projects of any size for eastern Canada's terrain. Our customer-focused sales team and experienced operations team know what it takes to keep your project on schedule and within budget, that's why we take care of the logistics too.

Matting offers ground protection from the wear and tear of heavy equipment and traffic as well as helps protect against soil contamination. Maple Leaf Matting also offers full-scale mat washing services to meet the cleaning standards some locations demand.

ACCESS MATS

Access mats provide the perfect balance between environmental protection and cost efficiency.

CRANE + RIG MATS

Crane mats can be used in a variety of matting applications including pipelines, construction, and transmission lines. Our mats are designed to make maneuvering and lifting easy. These industrial mats are very durable and can stabilize heavy duty equipment in the harshest conditions.

MAT WASHING SERVICES

Mat washing services address strict environmental concerns when renting used mats or moving mats from one piece of land to the next on a project. Our efficient mat washing services are available to clean a variety of mats such as wood mats, rig mats, and crane mats of any size.

MAT MOBILIZATION + DEMOBILIZATION

The Maple Leaf Matting team is with you from start to finish and available for mobilization and demobilization on any size of matting project. Our team handles the coordination and execution of all project logistics to meet any pipeline, power or construction project requirement.

SLURRY CELLS

Slurry cells are an above ground portable storage option for fluids, solids, or slurries, built to 40' x 40' in size. They have a grated safety walking area around the outside perimeter of the pit. Slurry cells are excellent for hydrovac operations, spoil piles, contaminated soils and fluids.

SIGNATURE SYSTEMS

-EXCLUSIVE CANADIAN DISTRIBUTOR-

Maple Leaf Matting and its parent company, Strad, are the exclusive distributors for Signature Systems' matting products in Canada.

MEGADECK HD+

MegaDeck HD+ heavy-duty composite mats are designed specifically for high-traffic work sites, such as power transmission, oil rigs, and construction sites. MegaDeck HD+ mats create a stable work platform or temporary roadway in extremely soft and wet ground conditions.

SIGNAROAD

Designed to be used in a wide range of applications, from temporary roadways for remote utility repairs to portable event flooring and accessways for concerts, music festivals and other outdoor events, SignaRoad composite mats provide superior temporary access for almost any vehicle, and have an efficient, easy-to-use connection system.

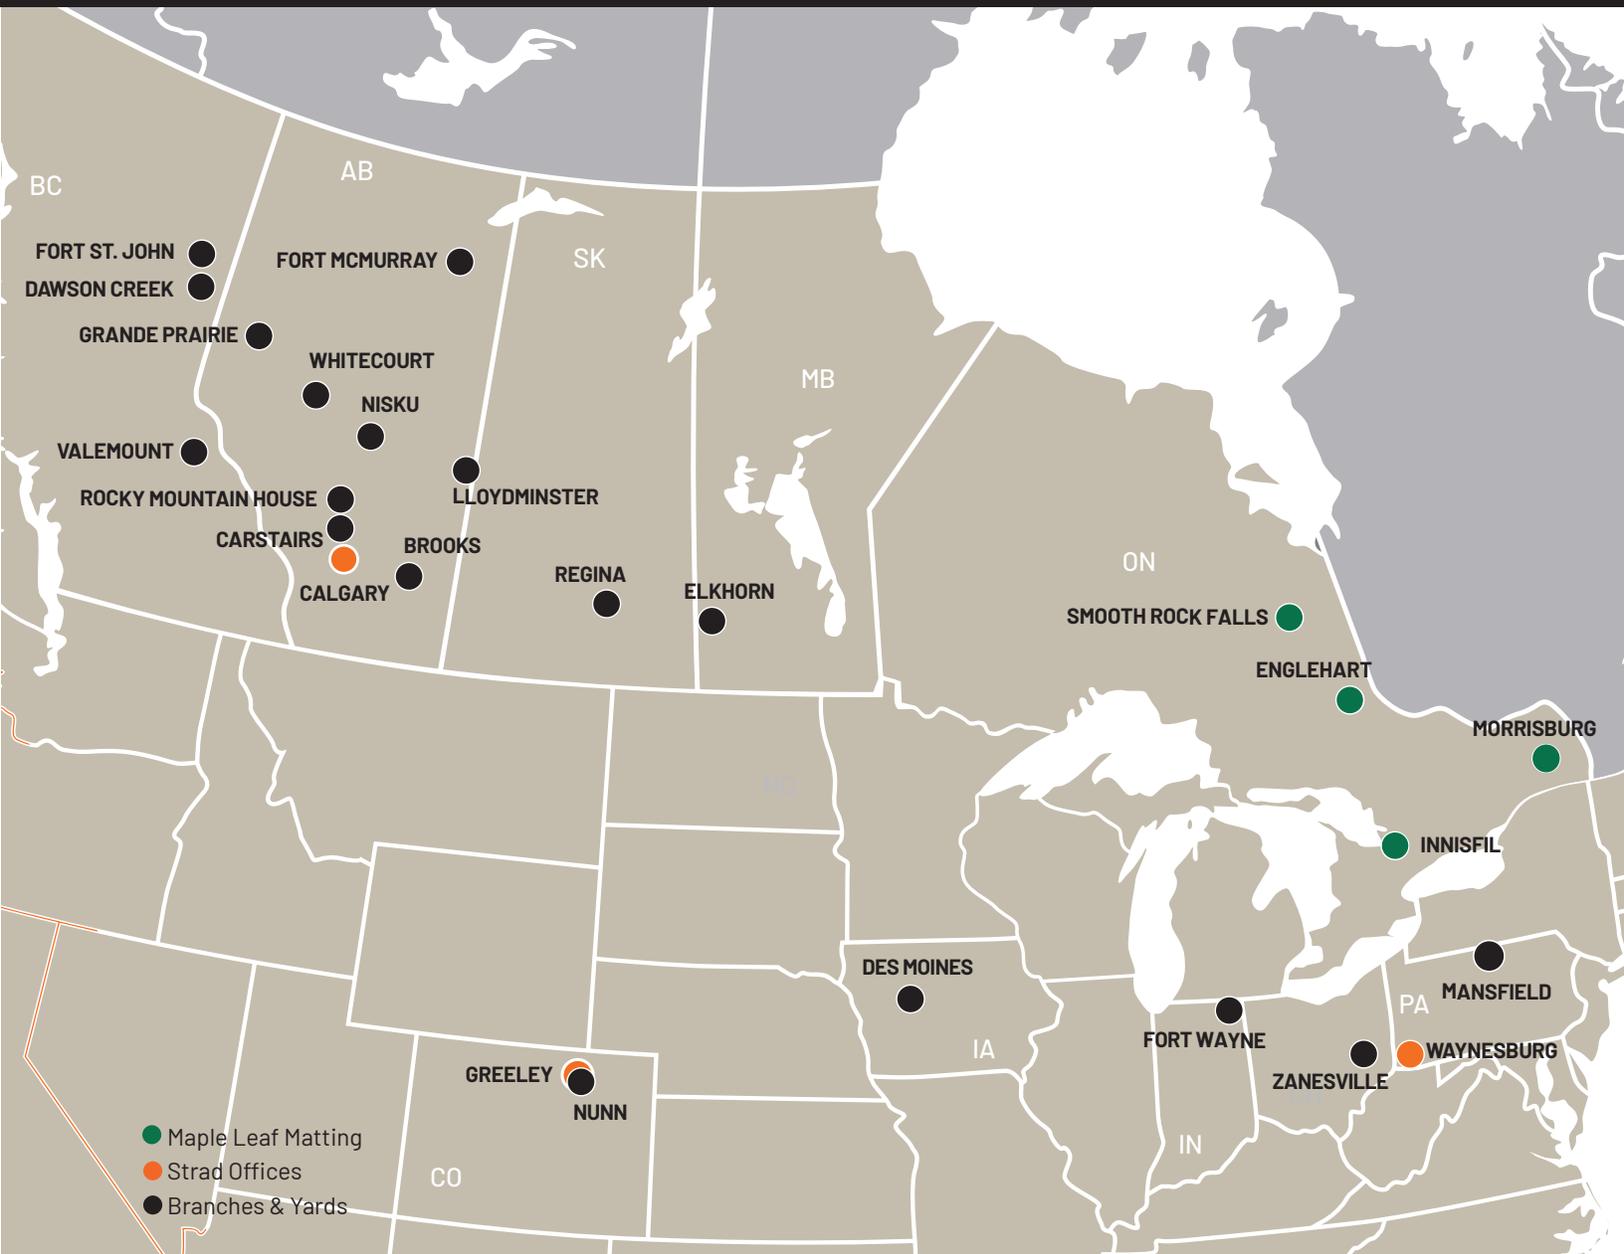

DIAMONTRACK

DiamondTrack track out mats feature a distinctive diamond-shaped terrain, delivering unparalleled strength, durability, and effectiveness in tire deformation and sediment dislodgement. Unlike rock alternatives that require frequent replenishment and costly and time-consuming cleanup, after initial installation, DiamondTrack mats are virtually maintenance-free for the duration of your project.

OMNIDECK

OmniDeck HD and LD ground protection systems quickly transform your turf into a multi-purpose venue for large scale events. Whether you are having a concert, commencement or a small on-field gathering, OmniDeck portable flooring will protect expensive turf against damage and keep your visitors safe and comfortable.

A ENIGOK | OUR COMMITMENT TO INDIGENOUS COMMUNITIES

We believe Maple Leaf Matting can make a difference through strategic partnerships that support the diverse priorities of Indigenous communities. We will go beyond so that every group we work with shares economic benefits.

Maple Leaf Matting and its parent company, Strad, joined the Canadian Council for Indigenous Business (CCIB) in 2019, and achieved the **Silver Certification Level** with their Partnership Accreditation in Indigenous Relations (PAIR) Program in 2025.

We are a supporter of Tree Canada's National Greening Program; the leading national tree planting charity in Canada which has planted over 80 million trees since 1992.
